Wow Wow Wow

Message:
Received my new grate last week and just started my first fire. Haven't used my fireplace in over 10 years because the smoke was unbearable. This thing kicks butt big time. Crazy hot heat and not one puff of smoke. This is the best money I have spent for anything in years. What a pleasure to do business with geniuses like you. Posting a picture to my facebook now so I can brag to everyone about it. Thank you soooooomuch!

testimonial

Message:
I feel compelled to write and attest to how effective your grate is. After 17 years in my house this is the first year we have been able to enjoy our fireplace. The grate performs exactly as promised: high heat output, fire burns completely, and, most importantly, for some reason the fire no longer makes the rest of the house cold. Kudos!!

Excellent product/testimonial

Message:

Recently I received our grate. It really does dramatically improve the heat production of our fireplace! All I had to do was unbox it, place it in the fireplace, start up the fire and once the coals started collecting we could really feel the heat radiate. Our formerly smoky fireplace had a nice updraft and no smoke in the house. Really a great grate! Thanks. Just wanted to give our feedback after several fires. We love the look and the improved efficiency of burning real wood.

Testimonial

Message:

I've had an M-5 grate and an RF-5 reflective back for over a year now and I am very happy with them. I use them in a Heatlilator fireplace insert that often produced some smoke in our house. The GWOF grate is very heavy duty and shows no sign of weaking after a year. We usually burn 3-5 fires a week for 4-6 hours at a time. The heat produced from the radiant ember bed is much greater than with the old standard grate. My wife likes that fact that we have had ZERO smoke issues since startign to use the new grates, even with damp wood.

I don't usually recommend products on the web, but this one has performed so well and stood the test of time, that I'm hoping that my comments will help someone else make the decision to use the GWOF grates in their home.

We love the "Grate wall of Fire"

Message:

I ordered the "Grate wall of Fire" just before Christmas. It arrived in under a week and I used it immediately and haven't stopped since. I have been really impressed with how well the fire drafts and how I don't need to continuously "mess" with the logs. It keeps feeding them and I just toss a few new ones on the top once in a while. Also, the heat output is much greated that the conventional grate that I have been using. Thanks for a great USA product.

Great Product

Message:

I was very reluctant to purchase your product at first until I seen the results. My wife and I bought a cabin in Northern Minnesota with an insert wood fireplace twenty years old. I inspected the chimney and the insert thoroughly before use and was very unsatisfied with the performance. It smoked inside the cabin and the production of heat was a bare minimum even with the heat fan operating. The question was to remove the insert and purchase a newer one. The price was prohibited for a new insert. Saw your ad on the television and did some research on the internet and said "what the heck". We purchased the S5 and the reflector plate and "Oh my...." what an improvement of heat (without the fan running) and no smoke in the cabin. It improved the fireplace of at least 200%. You folks have a great product and you may use this email as a positive customer review. AND IT IS MADE IN AMERICA. Keep up the great work and the superior products.

Message:

I just wanted you to know i received my M5 grate today and got to put it use this evening. I too was VERY skeptical about your claims and didn't think I would see a difference between your grate and the conventional flat grate I had been using. Boy was I WRONG! After establishing a fire and getting a good bed of coals I started to really feel the heat pour out of the fireplace. Before, I'd start a fire only to feel my feet going numb after a few minutes. Tonight, I enjoyed a nice toasty room and no cold feet! I coultn't imagine such a simple change could make such a HUGE difference! Even more amazing was how much LESS wood I burned. I just wanted to thank you guys for offering such a fantastic product and I can't wait to share my experience with all my friends!

what a Grate Gift!

Message:

When I wanted to give my husband the Grate wall of Fire and a Fire Back for his birthday, I called the company to confirm my options. After speaking to them I decided on a different size grate to accommodate my andirons. They also made sure that I got both in time for my husbands birthday. He loves the Grate and the Fireback. We get more heat and my fireplace is much cleaner since the ashes stay in a more concentrated area. You will love the Grate wall of Fire and the Fireback, and the company's customer service is impressive. The best part? It's Made In America!

I love the grate!

Message:
I have had the grate for several months now, having bought it with high expectations. It works even better than I could have imagined. One base log, an Enviro-Log firestarter, a half dozen pieces of kindling, and one log on top, and it takes off on its own. No smoke in the room, but lots of heat! I love it and would not do without it.

Thanks to GwoF, and highest recommendation to anyone thinking of buying one.

Alec

Testimonial

Message:
Received my grate and reflective fireback just before Christmas 2011. Had a fireplace that was so smoky that the smoke detector would sound during most fires. I was also having to constantly tend the fire so it wouldn't go out. We finally gave

Testimonials 7

up. I didn't buy wood one year and used the fireplace on Christmas day and that was it. Was thinking that perhaps a fireplace insert might fix the problem. Was doing an online search when an ad for grate wall of fire appeared in the margin. I read the testimonials and the specs and thought this might help my problem and would certainly be cheaper than an insert. I was a little hesitant to buy a product that I had never seen and that no one I knew owned. I decided to give it a try, figuring that it was a fraction of the price of an insert. It arrived very soon after I ordered it. I tried it immediately and was shocked how well it worked. The smoke problem was completely taken care of. I have to stoke the fire very rarely and can leave the room without worrying the fire will die. A fantastic product. Surprised I hadn't seen one before and sure wish I had known about it years ago. Thanks. Joe from Towson, MD

Grate Wall of Fire

Message:

Last fall I purchased grates for our double-sided fireplace and I just wanted to say

Testimonials 7

we couldn't be happier. The heat produced is greater than with our old grate and the grate holds our wood in place much better. We have not had a log roll off once. Because the fireplace is double sided, I don't know that we burn less wood but the fire is definitely hotter and produces a great deal more heat. We are very pleased with the outcomes - thanks so much!

Wed, August 1, 2012
Good Morning,

Just letting you know we recv'd our shipment on Friday as you had so kindly arranged for us. Our fireplace looks simply awesome. The grate and back plate are a substantial addition and really do our fireplace justice.

Thank you so much for working with me and accommodating our tight shipping window. I really can't wait for cooler weather to spark this thing up!!!

All the best,

René B.

Message:

I'm so pleased with the grate we bought from you last year, that I've been telling everyone about it - in fact, several neighbors (from west Simsbury) will be coming to you over the next month to get theirs in time for Fall/Winter weather.

I run a small Yard Svce company here in W. Simsbury www.yards-r-us.com and you'll see that I recommend your grates. You'll see where, under the 'links' page of the site.

Thanks again for a Great Grate - we'll prob'ly be coming to get a fireBACK too later in the Fall.

Kudos

Message:

I wanted to pass along my extreme satisfaction with the two products I have from you company. I have a fireplace grate that I love and receive many positive comments about. Last night my wife and I used our outdoor fire pit for the first time and I cannot wait to use it again. Both products are high quality and made to last. I have another fireplace that will eventually be getting a wall of fire grate. Thanks again!

Ben

Scott W.

Subject:
M7 with Back plate

Message:

Bought an M5 for me and an M7 w/plate for my son as a housewarming gift. We installed it after work yesterday and fired it up. He has a chimney in the middle of the house. Here is his initial reaction from an email he sent me this morning: Took a little bit to get going (as you mentioned) - but when it gained momentum - there was just no stopping it. I was able to fully load up - including logs that were far too large for the classic grate. Even with the most attentive tending, I could never get the large logs to burn steadily or completely. After I let the fully loaded grate burn for a couple of hours, I turned in around 9. Did not touch a thing. When I went down at 6 - I was amazed to see that without a single poke or stoke, everything had burned down to ash. No semi-toasted log chunks to be seen. After breakfast I was standing in the kitchen and I had a strange thought - "did someone turn on the heat?" I then laid a hand on the brick in the kitchen. The whole wall was extremely warm and radiating. Overall, the heat output is very impressive - I am surely impressed with the automatic nature of the burn.

Thank you both !!!

Subject:
Solved our problem!!

Message:

Experts said we needed to rebuild our chimney and that the flues were too small - \$40,000 estimate. Your \$350 grate and reflective back just gave us our first fire after 8 years in our then-newly built home - no smoke in the house, drafted well and toasty warm! Thanks for a great grate - anyone who says everything has already been invented should be shown your redesigned configuration that makes something as old as FIRE work more efficiently! Send me referrals, as I'll happily testify to having my skepticism burned up in your excellent product's performance.
