

Cindy and George Iffland

December 2, 2001

Dear Jesse, Micah and Jared,

We are writing this letter to tell you how much we love the Wall of Fire! We purchased it with a bit of skepticism, as we really couldn't imagine that a fireplace grate could actually perform the way you all were boasting that it could. However, were we in for a surprise!

We used to have a problem with our fireplace smoking – gone!

We used to use the fireplace strictly for atmosphere, but now, we can actually count it as a heat source! What a difference in how much heat actually comes out of the fireplace into the room and not just up the chimney.

We are amazed at how we do not use as much wood as we had with our previous grate.

It is also nice not to have to get up every few minutes to poke the fire!

We have given the Wall of Fire to family members as gifts and they love it as much as we! We are also very proud to tell all of our friends of your invention and wish you well with its production and sales.

Sincerely,

George Iffland
