GRATE WALL OF FIRE

Dear Jesse,

I am still hopping up & down! I say, I am still hopping up and down!!

NO MORE STINKING SMOKE!!!
REPEAT, NO MORE STINKING SMOKE!!!!

We were going to give up on the fireplace and put in an insert, but after seeing your Grate Wall Of Fire Grate [and having such a pleasant conversation with you] I decided to go for it.

I cannot begin to tell you how **OVERJOYED** I am.
By golly, that Grate of yours works!
No Smoke, Radiating Heat, plus **MADE IN THE USA!!!**
No poking the logs! Everything you claim is true.

We were unable to use the fireplace, even after putting on a top damper, having it cleaned, & replacing the grate with the type that are sold everywhere, and I am going to add that those are useless.

We had smoke so bad that on every attempt to use the "Place" the entire house would fill with smoke, and the Carbon Monoxide Detector would go off. Which meant we had to throw water on the smoldering logs, to allow us to turn on the whole house fan to rid our home of the noxious odor and fumes.

Those days are indeed gone now thanks to your wonderful product!!

Sincerely yours,

Jane Day
Red Creek, NY 13143

Thanks Jesse 😊
