TO THE FOUNDER & MAKER OF "GRATE WALL OF FIRE" -

When I stopped in to see you a couple weeks ago, all I was looking for was a copy of your Brochure - and to tell you how greatly we are enjoying our very own "Grate" of the same name.

This "GRATE" has revolutionized our fireplace - because now we are able to get a Lot More Heat from it with such a lot less effort (your idea of just being able to Pile On More Logs at a lot longer intervals than ever before) has lessened the task - plus - our fireplace no long smokes, even when we have our special stove going full blast on the other side of the chimney wall. That last remark is certainly the most worthwhile, since such has been a recurring problem heretofore. (Meaning Smoking Fireplace!)

I have sent the brochures you gave me out to a very Good Friend in California who is an Amateur Blacksmith - among many other skills - and I know that he will be tremendously interested in your design. Well, maybe he is not really an Amatwur, since he does teach BlackSmithing to anyone interested in learning the techniques. Not to worry - he will never try to produce your Invention for commercial purposes!

So - I was truly delighted to hear your fellow Staff Member(?) mutter "You Made His Day" as I was talking with you - I meant every word, for you have provided a Really GREAT GRATE - a Boon for everyone who enjoys a fireplace as much as my wife and I do!

We are much indebted to our good friend, Cleve Fussenich for gifting us with your Invention.

With all Best Wishes - and Thanks - to you.

Sincerely,

William A. Nelson
